

2003 "GET REAL" HUMMER H2

This Hummer H2 is known as the world's most photographed H2. It is the ultimate "Look at my new toy I just got." You can take this truck through the Alps and the out for a night on the town. If you want attention then this truck is a must have. You will feel like a movie star everywhere you go. Take it to any car show and walk out with a trophy every time. This H2 was built as a custom one-of-a-kind show truck by Realwheels Accessories. It has only 13000 babied miles and still smells new.

There was no expense spared on this truly custom show stopper. It has over 4000 hours worth of blood, sweat, and tears into it. Since we have already taken care of the shipping costs from the United States (estimated value of \$6,000 USD) there will be no charge for that, if the truck is purchased prior to the show ending. There has been well over \$225,000 USD invested in to this H2. All serious offers will be considered.

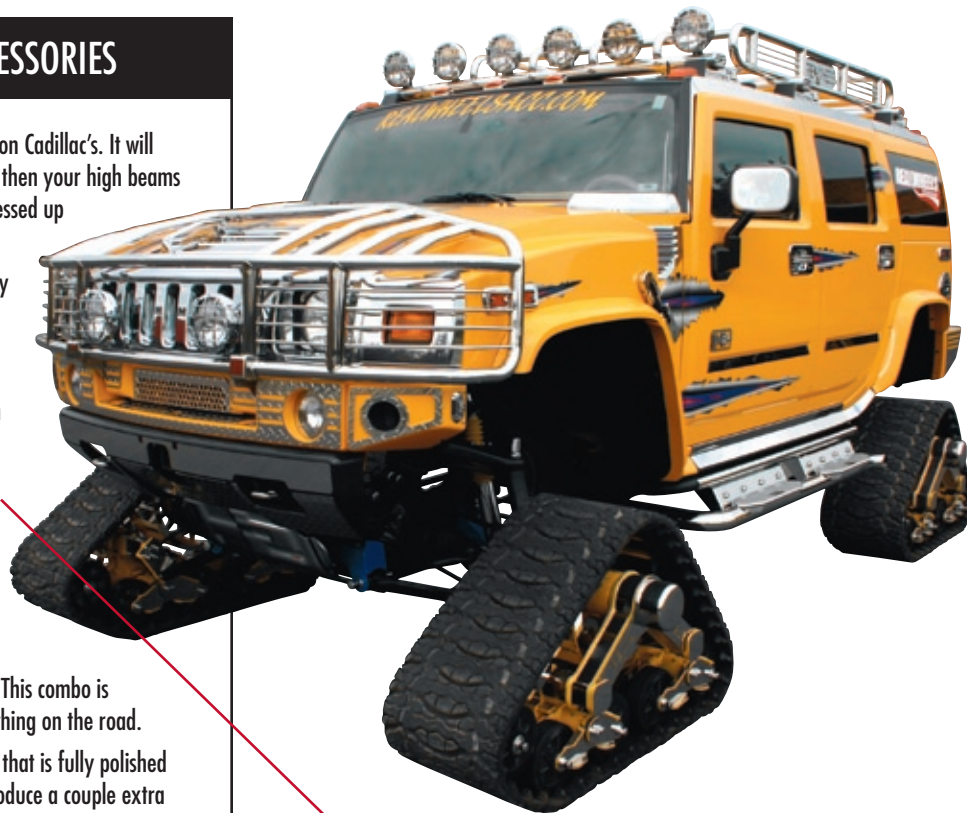

FACTORY SPECS & OPTIONS

AFTERMARKET CUSTOM ACCESSORIES

- Raytheon Night Vision, this is the same system found on Cadillac's. It will allow you to see objects 5 times further ahead of you than your high beams at night. These pieces are also custom painted and dressed up with custom built stainless steel trim.
- **Matrack 4-wheels track conversion.** This will definitely be the absolute show stopper. These tracks will go absolutely anywhere! They cost near \$40,000 USD new without the 150 custom designed stainless steel pieces on each track. (600 total pieces of custom designed stainless steel for the entire 4-track system) With these tracks on, you can travel at speeds up to 50mph and not even worry about anything. The tracks have under 50 miles on them still look NEW!
- This truck has a 6 inch Fabtech Suspension lift kit on it. This brings the truck up to in monstrous size.
- When you're on rolling on the track, you have 40 inch Goodyear MTRs with 17" Mazzi Hulk Chrome wheels. This combo is huge. They will make sure that you tower over everything on the road.
- For Performance the H2 has a Corsa Catback exhaust that is fully polished to a mirror finish. There is also a cold air intake to produce a couple extra ponies. Just give the truck a little gas and hear the 325 HP V8 Scream!
- Two Hadley Air-Horn systems designed for the H2 with a built in air compressor (you can inflate your tires, raft, etc... from your air horn compressor, built in switch to alternate from factory horn to air-horn) Warning: Extremely LOUD, use caution around others
- This Truck also has a stereo that can back up is mean looks with a mean sound. **It has 2-cooustic 12 inch subwoofers, 4-MTX tweeters, and 6-MTX speakers for you mids and highs.** The system produces crystal clear sound loud enough to hurt your ears if you want to.
- Custom built over-the-hood style brush guard with inserts (one mean looking brush guard, unlike anything else available)
- Custom built Stainless Steel Roof Rack (6.5 foot fully Custom one-of-a-kind mirror finish Roof Rack)
- Custom Solid Billet Aluminum Rear Louvers. These massive pieces have built in LED light in the rear so they won't go unnoticed even at night time.
- Chrome Billet Aluminum door pull handles (not factory plastic ones) & over-sized door handle bezels
- Chrome Billet Aluminum locking fuel door
- Chrome Billet Aluminum over-sized hood latches
- Chrome Billet Aluminum over-sized front and rear side marker light bezels
- Chrome Billet Aluminum rear door pull handle
- Chrome Billet Aluminum front and rear upper market light bezels
- Custom Chrome Billet Aluminum HUGE over-sized 5 inch wide side steps (actual step is Chrome Billet Aluminum, not plastic like all of the other steps you see around)
- Chrome Billet Aluminum roof rack knobs and end caps
- Stainless Steel roof rack covers

MATRACKS w/CUSTOM STAINLESS STEEL

"GET REAL" POWER SOUND SYSTEM
